

Granite State Arts Academy Technology Needs Assessment

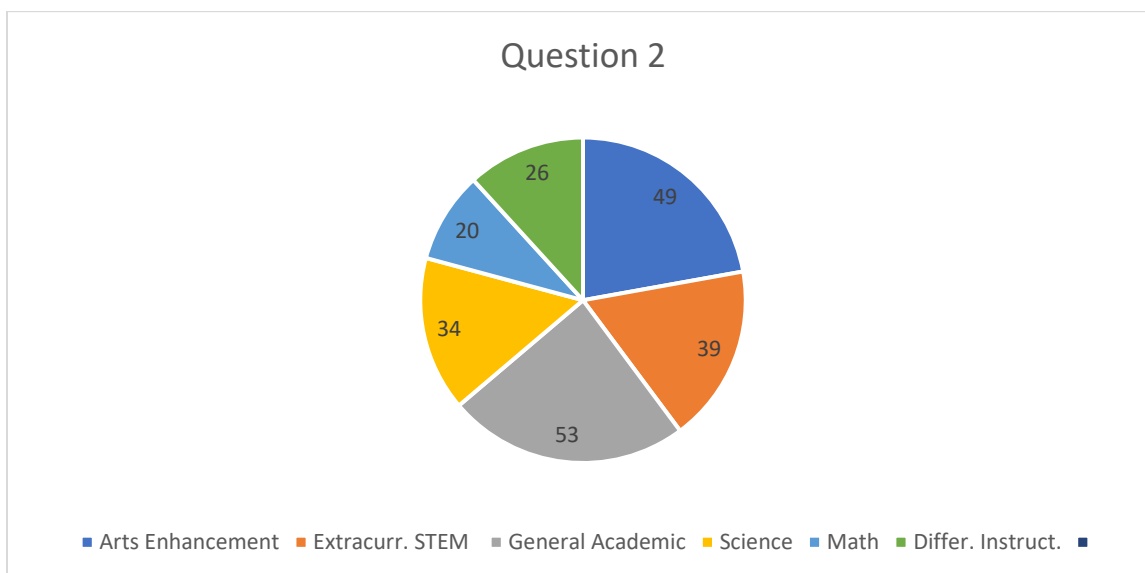

2021-22 School Year

The following is the results of the needs assessments handed out to all our Students, Faculty, Staff, Parents and Board Members.

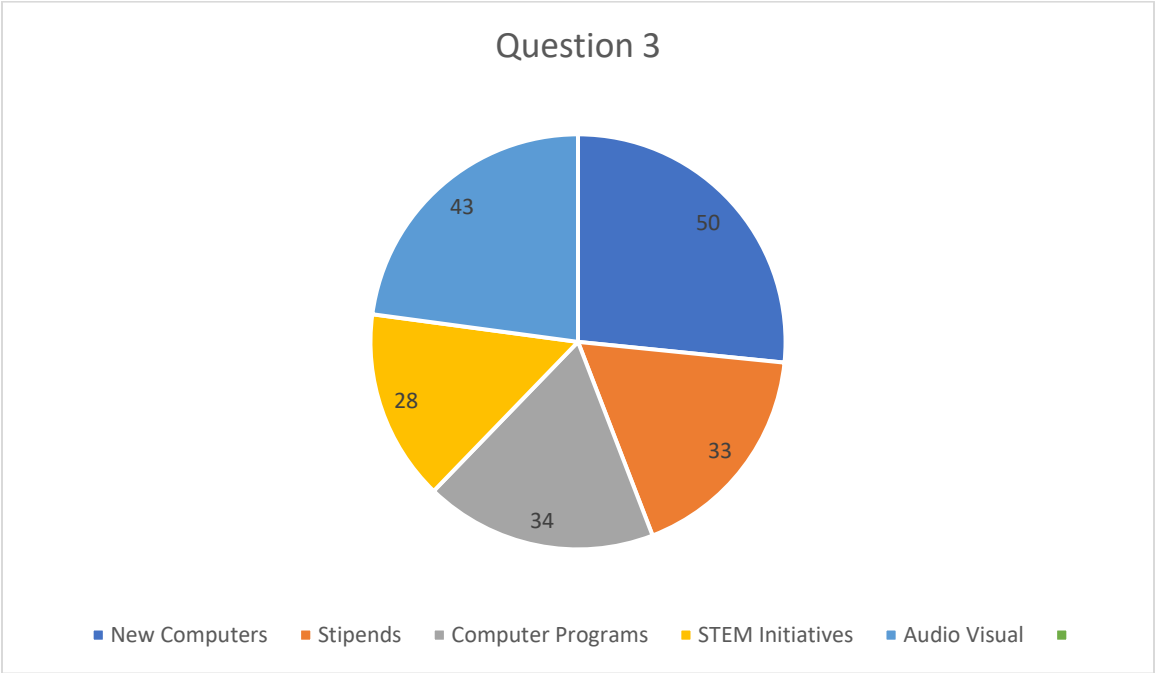

Question 1- How would you rate the overall need for additional technology for our students?

Question 2- In which of the following areas do you feel that additional technology would be most beneficial to our students?

Question 3- How do you think that funding allocated for additional technology would be most beneficial?

After reviewing the above results of our survey we feel that targeting getting new computers for both the students and the staff is a good use of our funds. This will help target both the general academic and arts enhancement needs. We will then assess the financial status before pursuing subsequent results.
